

Pedal load cell

for measuring the pedal operating forces

Model 8400-B001

Contact

- ☎ +49-7224/645-57 or -45

Features

- Measurement ranges 0 ... 200 N to 0 ... 2 kN (further measurement ranges on request)
- With integrated large ergonomically shaped operating plate
- Linearity < 0.5 % F.S.
- Optionally available with two range version
- Extremely flat and compact design
- Insensitive to forces traverse to the operating direction
- Simple handling

Application

- Determination of braking force in test benches or directly in the vehicle
- For use in car and utility vehicles
